

MERN Full Stack Developer

SUMMARY

EXPERIENCE

Jaipur, India

- Built reusable UI components like Navbar, Cards, Forms, Dashboard
- Worked on **REST APIs** using **Node.js & Express.js**
- Integrated MongoDB for database operations (CRUD functionality)
- Implemented User Authentication System using **JWT & Cookies**
- Designed and developed Login & Signup system with validation
- Created dynamic features like Product listing with API integration
- Added Edit/Delete functionality
- Worked with **API handling (Fetch / Axios)** and handled async operations
- Improved UI/UX with responsive design & modern layouts

Jaipur, India

- Developed 20 reusable frontend components, ensuring consistent UI design across the application
- Built responsive user interfaces using **Tailwind CSS** with clean and modular code structures
- Optimized frontend API integration, reducing bugs and improving system reliability
- Strengthened skills in **JavaScript fundamentals**, **MERN stack architecture**, and **DSA problem-solving**
- Debugged, tested, and fine-tuned frontend modules for enhanced performance and scalability

Ajmer, Rajasthan

01/2020 - 05/2024

Solved 30 coding problems on LeetCode using JavaScript, improving problem-solving and coding efficiency

Hindi (Proficient)

React, Node.js, MongoDB, Tailwind, Modular JavaScript, REST, Express.js, JWT, Axios, HTML, CSS, GitHub, ECommerce, Redux Toolkit, Mongoose, Visual Studio Code, Linux, Postman, Fast Learner,

01/2023 - 05/2023

- Built a secure and role-based admin panel to manage users, content, and system operations efficiently
- Designed **responsive dashboard UI** with reusable components for better scalability and consistency
- Integrated **REST APIs** for real-time data management and seamless backend communication
- Implemented data visualization and structured modules to monitor system performance and activities
- Optimized **CRUD operations** and state management for faster data handling and reduced latency
- Ensured clean architecture using **MERN stack principles** for maintainability and scalability
